

Bothell High School FIRST Robotics team #10079

Bordie at Sea!

On October 11th and 12th, we participated in the Bordie at Sea, an off-season event organized by the Robototes 2412, based in Bellevue Sammamish, Washington.

Superintendent

Though we faced challenges, the experience was invaluable:

- We established new connections with teams from all across The PNW, Idaho, and Canada.
- New members of our team gained exposure to the competitive environment of FIRST Robotics.
- Our photographers were actively capturing moments from the event.
- Our drive team tested and validated our new design for our ground intake, a strategic mechanism that we are adding this year, and we are planning to make this a permanent fixture to our robot design in the future.
- We engaged in scouting activities to observe other teams' strategies, and we were fortunate to have supportive fans cheering for us.

TEAM PHOTO

As a cohesive team, we acquired significant insights that will help us mentally prepare for future seasons and upcoming events. Overall, we embraced the spirit of camaraderie and sportsmanship, reinforcing our commitment to being a genuinely supportive team.
